

I respectfully urge the FCC to reject NAB's petition 04-160 which will stop XM from providing valuable constant Instant Traffic & Weather without interruption. You cannot get that anywhere else and I happily pay for the service. I can't believe that big business is getting in the way of first ammendment rights. I prefer XM radio over any other raido source becaue of what they offer.

Please do not allow the NAB to step on the basic rights our nation was founded on. There has been enough of that lately. Its caused many of my acquaintances to leave what I thought was the land of the free.

If the radio stations want to get heard, they need to quit talking and spweing spam every 5 minutes. I would gladly pay for a service that provides what XM does ... infact, I do. Its called XM.

A frightened citizen,

Lee Strom
